

How to Use Your Hellbender Kit

Surface & Air: Sprays #1, #2, and #3

Step 1 – Spray #1: The Disruptor

Spray #1 starts the sequence with a high-pH solution that penetrates biofilms, denatures mold fragments, and disrupts the molecular structure of embedded toxins—preparing them for removal

Spray in the air and on items & surfaces. Then immediately proceed to step 2.

Step 2 – Spray #2: The Neutralizer

Spray #2 meets the alkaline action of #1 with a controlled acidity, neutralizes it, and—through that pH shift—binds and removes the residues, completing the clean at a structural level

Apply Spray #2 where Spray #1 was used.

Allow to dry or wipe clean. Then immediately proceed to step 3.

Step 3 – Spray #3: PROTECT

Spray #3 neutralizes airborne toxins and forms a living defense layer on surfaces.

Mist into the air above the area you cleaned. Avoid direct saturation—this step works best when used sparingly.

Use everywhere - spray on your sheets before bed, on pet fur and skin, on houseplants, in pet crates and in trash cans.

For best results, apply each spray as the finest mist possible. Use an atomized spray from a continuous mist sprayer, an electrostatic or cold (not hot) fogger, or adjust the red nozzle tip on the spray bottles provided to achieve the smallest possible droplet size. This improves coverage and airborne toxin neutralization both in air and on surfaces.

Washable fabrics & textiles: Laundry Solutions #1 and #2

Laundry #1 – Wash Cycle (Clean Wash)

Add 4 oz to the **wash** (WITH liquid sudsing laundry detergent) to denature and dislodge mold toxins from fabrics.

Laundry #2 – Rinse Cycle (Clear Rinse)

Add 4 oz to the **rinse** to bind and wash away what Laundry #1 has released.

Always use in order: #1 (wash), then #2 (rinse).

Skin & Hair: Foams #1, #2, and #3

Foam #1 – Clean

Apply to skin or scalp in the shower to break down & neutralize toxins.

Foam #2 – Clear

Follow immediately with Foam #2 to clear and restore an acidic skin pH.

Foam #3 – Protect

Use last to calm skin and leave behind a probiotic defense.

Can be used during & after showering or anytime as a leave-on shield.

Important Reminders

Always follow the sequence: #1 (disrupt), #2 (neutralize), and #3 (protect). Each step prepares the way for the next.

Avoid contact with eyes; in case of accidental contact rinse with water.

Always wear appropriate personal protective equipment when cleaning.
