

How to Hellbender a Car

How to Hellbender Your Car

Supplies:

- **Spray #1; Spray #2; Protect! Spray**
- **Trash bags & towels or microfiber cloths**
- **New cabin air filter (order from your local auto parts store. We recommend carbon/allergen types that are wrapped in plastic inside the box).**

***If your car makes you sick, get someone else to do this for you.
If that's not possible, wear appropriate PPE!***

Work outside - do not leave the engine running in an enclosed space!

1. Start with Spray #1 and work from the outside in.

Lightly spray the exterior with **Spray #1**.

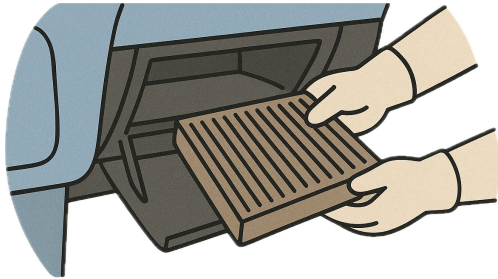

Fog or mist the interior with **Spray #1** for 5-10 seconds.

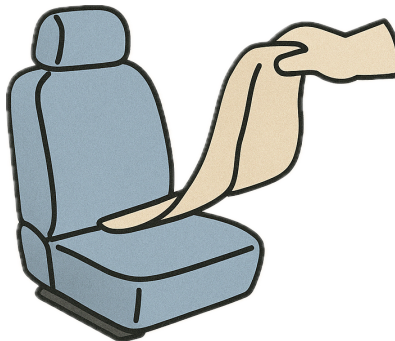

2. Then prepare the interior.

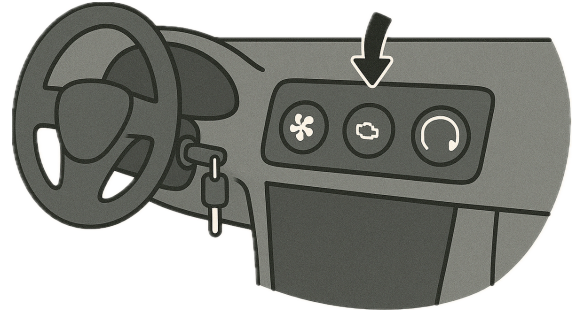

Remove & Discard the cabin air filter.

Remove all seat covers and floor mats.

Turn the car and a/c on. Set the a/c to “recirc”

Open all storage compartments, fold seats forward and put visors down. Turn off all touch screens.

3. Fog or mist the interior **again** with **Spray #1** for 5-10 seconds or until it's filled with a light, transparent fog. Close the door with the engine running & the air conditioner on "recirc" to allow the fog to circulate through the HVAC ducts.

**After fogging the interior again with Spray #1, wait a couple of minutes before proceeding with Spray #2.
It's OK if it dries but not necessary.**

4. Switch to *Spray #2* and work from the outside in.

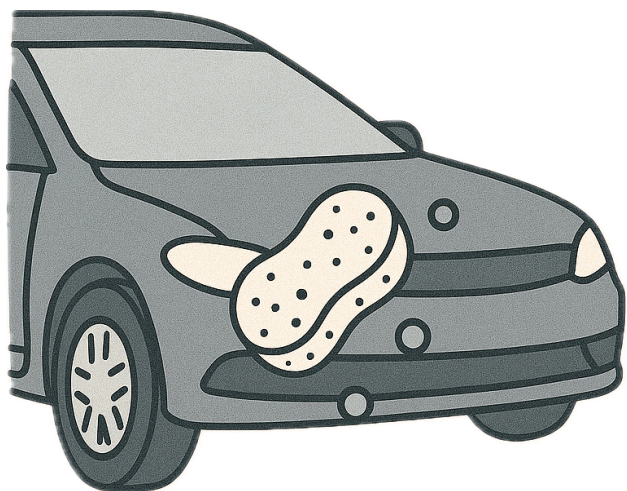

Lightly spray the exterior with *Spray #2*.

Fog or mist the interior with *Spray #2* for 5-10 seconds or until it's filled with a light, transparent fog. Close the door and allow the fog to circulate through the HVAC ducts.

5. While the interior dries, wash the exterior with soap and water (optional).

6. Spray & wipe interior surfaces *again* with **Spray #2** for a streak free, sparkling clean!

7. Mist the air inside the car with **Protect!**

And finally...

- Lightly mist the **new** cabin air filter with Spray #1.
- Install the **new** cabin air filter once everything is dry.
- Clean or launder all mats and seat covers with hellbender sprays or laundry solutions **before** re-installing them.

Hellbender Laundry Solutions may be used in an upholstery cleaner to decontaminate upholstered surfaces and carpets.
